PROJECTS

10/04/2021 – 20/02/2022

● **Smart Attendance Monitoring System**

We are three members team our project The Smart Attendance Monitoring System is AI powered attendance system which not only be the student attendance system, it monitor student's presence till end of class, student who were not being recognized by system will be marked absent.

In era of Artificial Intelligence where everything is done using artificially design algorithms. We use these algorithms for attendance system domain. We mark attendance by face recognition using deep learning and OpenCV.

05/11/2020 – 17/03/2021

● **Electronic Management Store**

I have develop Electronic Management Store by using different tools in Html, Bootstrap with Php, Xampp, and Database in SQL

20/02/2019 – 07/04/2019

● **Fire Detection System**

I have made a Fire Detection System by using Arduino and Flame Sensor.
