## SKILLS

---

- PHP(Laravel)
- Object-Oriented Programming (OOP)
- JavaScript
- HTML5
- Cascading Style Sheets (CSS)
- Bootstrap (Framework)
- AWS
- JQuery and AJAX
- Twilio
- Zoom
- Stripe
- Stax
- Authnet

## EXPERIENCE

---

### ***Invision Custom Solutions Inc. , Karachi • Software Engineer***

*(Apr/2022) - Present*

As a software engineer, I collaborated on a subscription-based app, introducing new features and payment gateways like Stripe, Authnet, and Stax. Integrating Twilio and Zoom enabled video calling functionality. Leveraging Laravel WebSockets, real-time notifications were implemented. I conducted code reviews, optimized app performance, and ensured thorough testing for bug-free results. Staying updated with Laravel developments, I contributed insights in team discussions, documenting project updates for knowledge sharing.

### ***Avancera Solution, Karachi • Software Engineer***

*(Dec/2021) - (Mar/2022)*

Managed projects as a software engineer by integrating front-end and server-side logic for seamless user experiences. Built reusable code and optimized applications for speed and scalability, enhancing user satisfaction. Implemented security measures and designed data storage solutions to safeguard sensitive information efficiently.

### ***Vital Group , Location • Software Engineer***

*(Apr/2020) - (Nov/2021)*

Managed and led web application projects using PHP and Laravel framework. Developed e-commerce platform with smooth transactions, product listing, shopping cart, and payment integration. Optimized database structure for efficient data management. Integrated third-party APIs for payment gateways and vendor integration. Achieved responsive design and user-friendly experience. Created coffee shop app with real-time order tracking and 10-minute delivery goal. Developed a separate rider app with GPS tracking and route optimization. Ensured data security and conducted code reviews to enhance application quality.

### ***YesNet Pvt Ltd. , Karachi • Jr.Software Engineer***

*(Sep/2019) - (March/2020)*

As a software engineer, I successfully managed projects to enhance a video streaming app, achieving remarkable outcomes. I implemented user-friendly features for subscription purchases, smooth playback, and browsing of movies and web series. The addition of a request feature allowed users to suggest content, ensuring engagement. Collaborating with designers and front-end developers, I ensured an appealing interface. Integration of secure payment gateways safeguarded transactions. Optimizing performance enabled efficient video streaming, and rigorous testing ensured a bug-free application. I met project deadlines and maintained a clean, maintainable codebase, adhering to coding standards and best practices.

## EDUCATION

---

***Usman Institute of Technology (NED) , Karachi • BS(Software Engineering)***

*Graduation Year (2020)*

***Govt. Degree College for Boys and Girls SRE Majeed II, Karachi • Pre-Engineering***
