- Perform status checks on the client side.
- I am uploading data and metadata into SQL Server.
- Do attend remote meetings via WebEx and Zoom.

PROFILE

I am a professional with 2 years of experience in databases and software testing. Skilled in testing, identifying, and reporting defects in databases and software products, with expertise in SQL queries and procedures. with the ability to troubleshoot and resolve issues efficiently. Adept at providing exceptional customer services to clients, resolving technical issues, and providing guidance and training on database software products with excellent communication skills.

RELEVANT SKILLS

1. Software Testing:
 - Generate test data as per the need of test specifications.
 - Setting up test environments as per prerequisites on virtualized environments.
 - Perform bug tracking, assignment, and resolution via Bugzilla tracking.
 - Strong knowledge and skills around test case creation and test execution.
 - Extract test cases from requirement documents.
 - Create an additional test plan for QA. Plans may include reviewing product specifications, testing errors, boundary conditions, and test system customizations.
2. Operating Systems and Virtualization:
 - Operating system installation and configuration.
 - Linux system administration.
 - Windows Server deployment and administration.
 - Virtualization technologies (e.g., VMware, VirtualBox, HyperV).
 - Shell scripting (for Linux).
3. Network Management:
 - Knowledge of network management concepts and their protocols.
4. Active Directory:
 - Installing Active Directory tools such as users and group creation.
5. Databases:
 - Strong knowledge of Databases.
 - Database design and development.
 - SQL (Structured Query Language) programming
 - Database security and access control
 - Data warehousing and ETL (Extract, Transform, Load) processes
 - Write queries in SQL and fetch data from databases.
 - Create SSIS Packages using SQL Server and Microsoft Visual Studio.
 - Write SQL Server stored procedures.

EDUCATION HISTORY

Pre-Engineering in Science

Institution: Superior College of Science
Year of Graduation: 2016
Grade B

Bachelor of Engineering in Software

Institution: Mehran University of
Engineering & Technology.
Year of Graduation: 2021
CGPA: 3.06
