### PROJECTS

#### Burger Builder App (React js)

- Burger Builder is an application scripted in React and deployed on Firebase, where users can order burgers by choosing ingredients.
- We just need to simply create an account and login to order your burger.

#### Attendance Management System (React Js)

- It is an Attendance management app for any company that has staff and it needs to manage their Attendance, Sales, campaigns, Tracking, and salary according to their performance.
- My role in this project is to design UI and reusable components.

#### Otobucks (MERN)

- it is a services provider project which includes Rent a Car, Auto Repair, House Cleaning
- I worked there as a React js Developer.

#### SafeSpace (React Native)

- it is a Mood Tracking App
- I worked there as a front-end developer.

### CERTIFICATES

#### Internship as React js Developer (Devsinc)

Worked with a team to develop and maintain the websites. Utilized React, Redux, and Firebase to implement new features and improve the overall user experience. Collaborated with designers and back-end developers to ensure a seamless user experience. Assisted in the implementation of responsive design, performance optimization, and cross-browser compatibility.

#### React js Developer Training (Pseudosquare Software Comapny)

They give us knowledge about a comprehensive understanding of aspiring front-end development ment on what goes into designing the style and user interfaces of websites. skills we learn ( Git, Github, CSS, HTML and Registration Form, JavaScript, and ReactJS)
