INTELLIGENT

INTEGRATED

INSTANT  
FEEDBACK.  
GREAT  
IMAGE.

## AdvancedReputation

Build a positive online reputation for your practice, providers & staff with automated voice-of-the-patient surveys.

### Automated

Emails & texts are automatically sent following a visit. Feedback is filtered based on satisfaction score. Positive feedback is leveraged to build a positive reputation.

### Intelligent

If survey feedback is negative, we ask for additional comments & post privately to a dashboard. If feedback is positive, we invite the patient to post their experience to your Google profile.

### Integrated

We leverage multiple systems - including scheduling, EHR, practice management & patient engagement - to reduce manual steps required to administer an online reputation.

## DRIVE ONLINE DOMINANCE.

In today's digital era of well-informed online consumers, patients turn to Google to help find a doctor. You have a tremendous opportunity to dominate in your specialty & geography by building a high reputation score.

Our doctor reputation management software helps you build a positive online reputation using automated surveys to gather patient feedback about recent office & telemedicine visits. Doctor reputation management surveys proactively & automatically finds happy patients & directs them to post positive feedback. In fact, we even have an automated process to help weed out the naysayers.
